

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [0022] with the following amended paragraph:

[0022] Figures 1 and 6 show[[s]] a partly sectional view of a multiplex arrangement with a multiplex body and a multiplicity of essentially identical subassemblies;

Please replace paragraph [0040] with the following amended paragraph:

[0040] The embodiment of the invention is not restricted to the exemplary embodiments presented above. By way of example, the spacers 5 may in each case be concomitantly integrated into the subassembly 4, for instance into the substrate 43. In this case, it may also be provided that the substrate 43 runs obliquely at the side facing the multiplex body 1 and directly adjoins the multiplex body 1 or the filters 3. Moreover, as shown in Figure 6, a plurality of spacers 5 may be connected to one another and premounted jointly on the multiplex body 1.
